# THE ANALOG DREAM

## SOUNDBANK

---

*For Ichiro Toda's Daichi labs Synth1 VSTi*

*(v1.12 or more)*

**1 – introduction**

**2 – How to install**

**3 – Legal**

**4 – More about the author**

**5 – Appendix : Patch list**

## 1 – introduction

Thanks for downloading the Analog dream soundbank for Ichiro Toda's Daichi labs synth1 VSTi (v1.12 or more). I hope you'll enjoy those carefully crafted patches, and that you'll have fun and that you'll do great music with them ☺

It contains 128 sounds in various genres : leads, pads, basses, keys, FXs,...

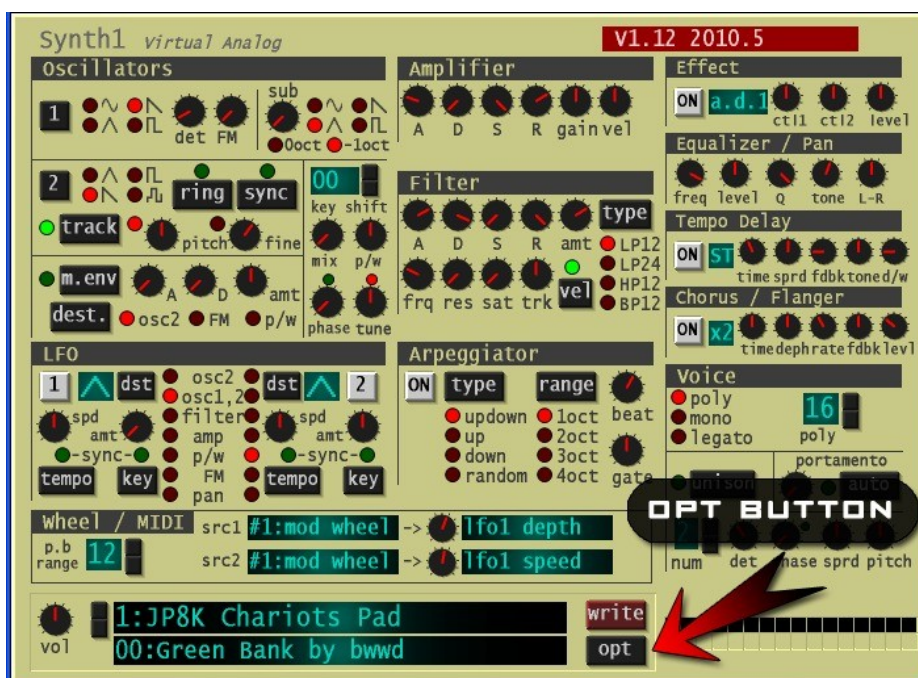

## 2 – How to install

This document assumes that you already have Synth1 installed on your computer (and registered to your DAW). If you haven't got this fabulous VSTi virtual analog synth, download it from it's creator's website :

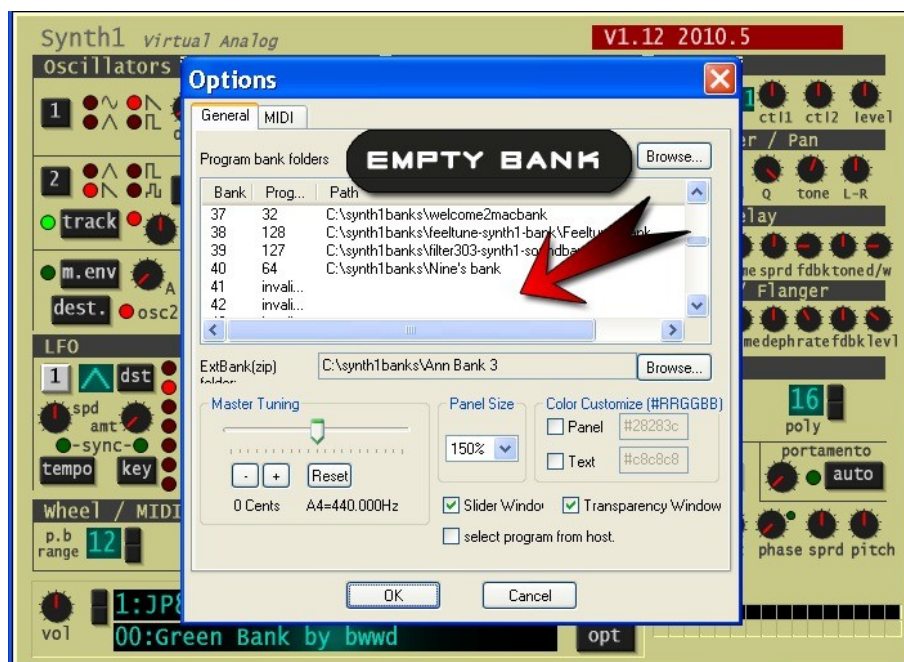

<http://www.geocities.jp/daichi1969/softsynth/>

OK, so here we are :

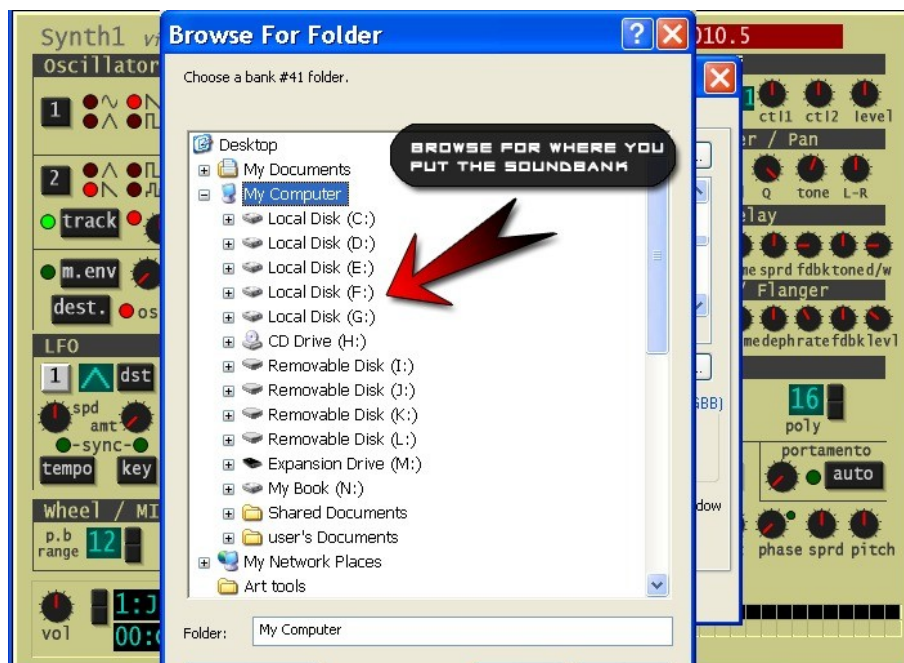

1 : Run a Synth1 instance and hit the « OPT » button down there :

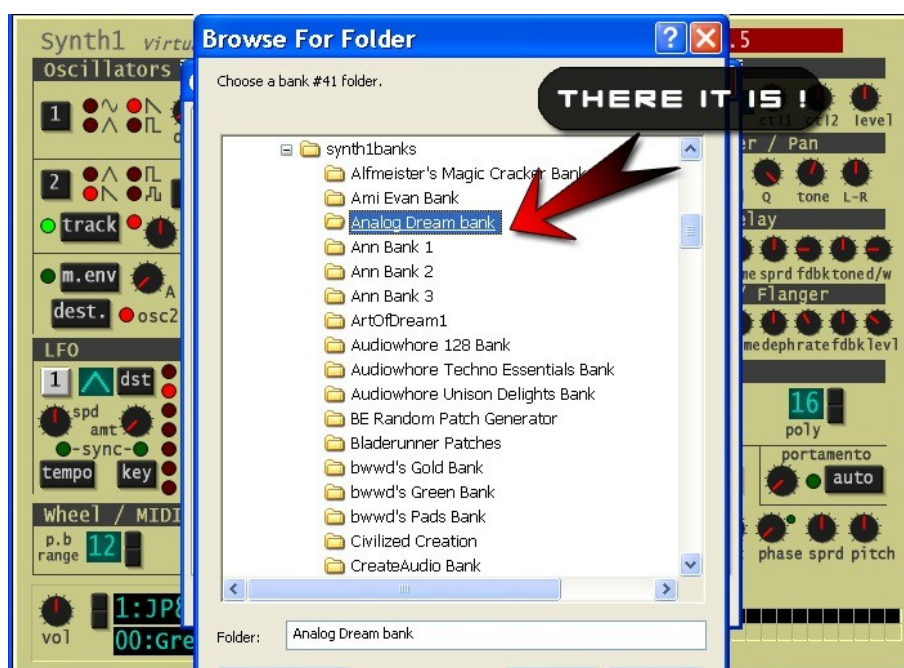

2 : Browse the program bank folders in search for an empty (invalid) soundbank (or choose an already existing bank if you want to replace it – this operation does not alter neither the previous nor the Analog Dream bank) and click on it.

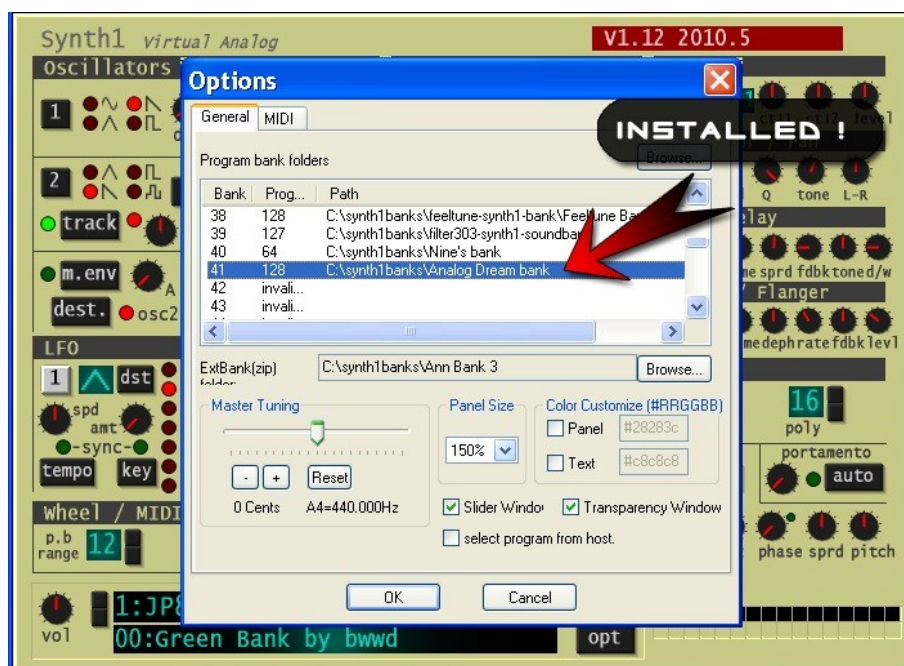

3 : Now browse your harddisk(s) for where you put the Analog Dream soundbank.

4 : You found it ? Click on it to install it ...

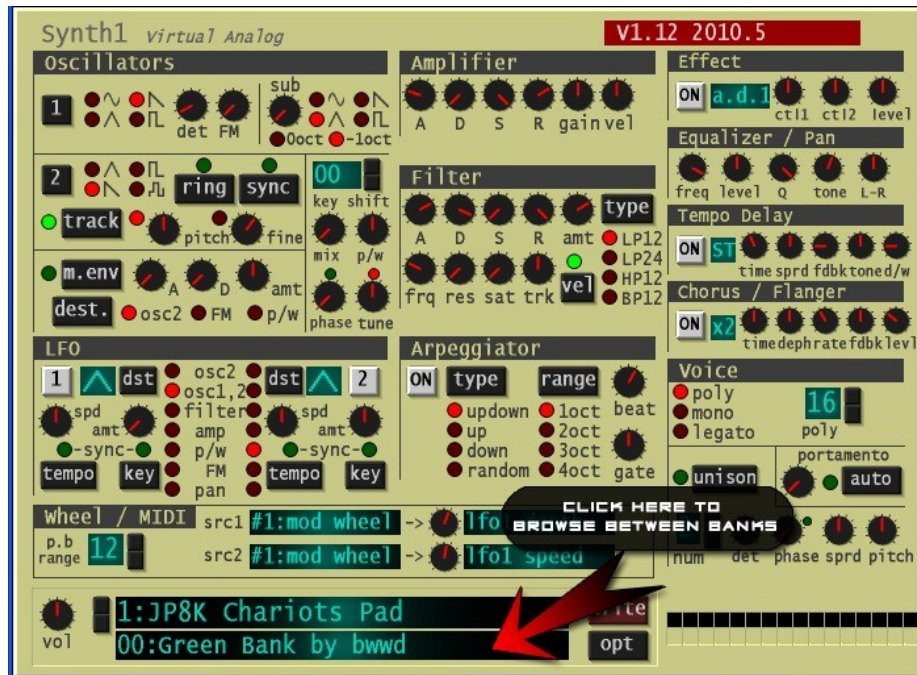

... done !

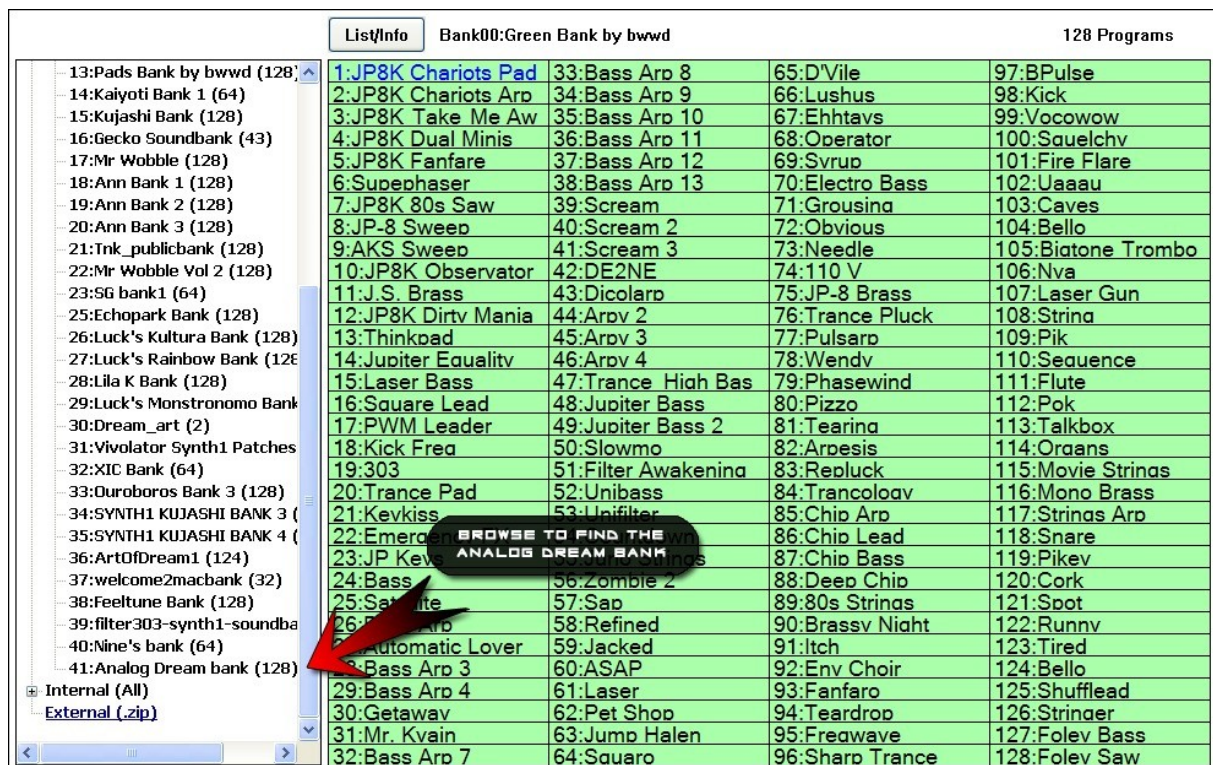

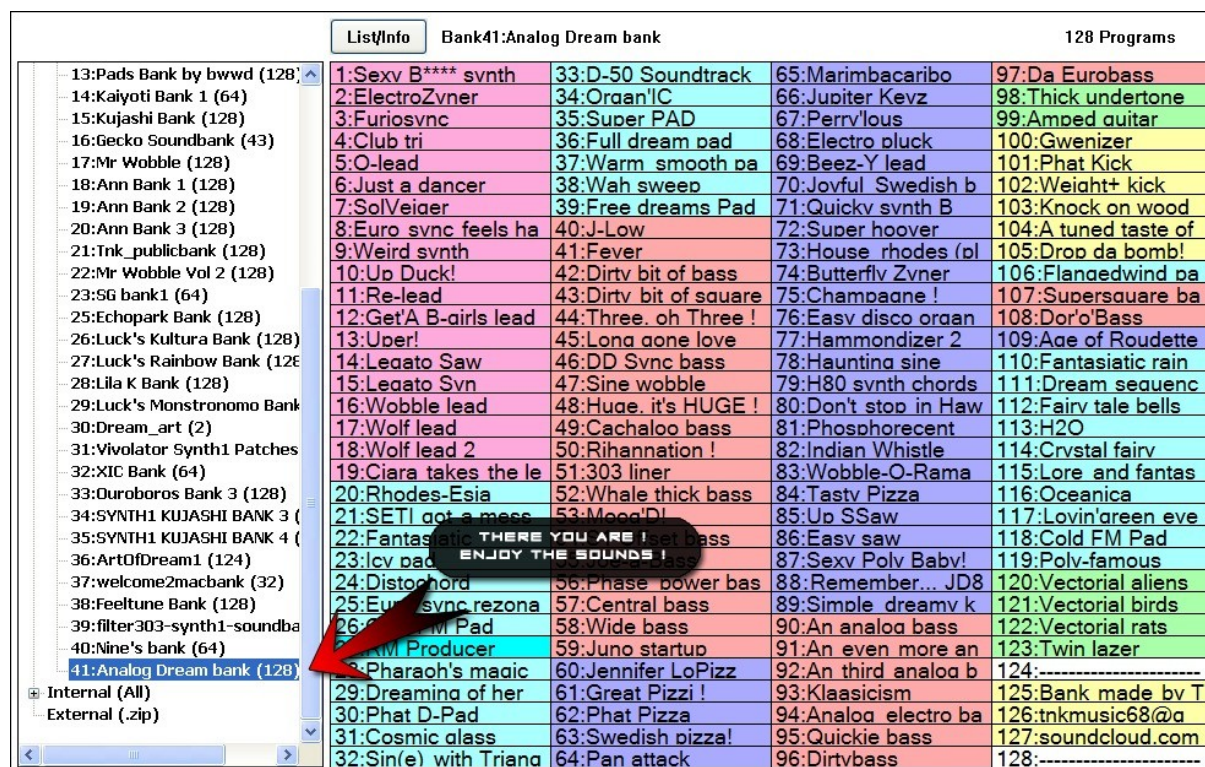

5 : Now that your bank is installed, you want to play around with the sounds, right ? OK so browse among your installed banks to find it. To browse among installed banks, click on the current bank used by Synth1 (Green bank by bwwd in the case of this graphic)

6 : The bank browser opens. Browse the left part of the window to find the Analog dream soundbank and click on it.

7 : Tadaa ! You're done ! Click on the Analog dream bank. The 128 patches list displays itself. Choose one and have fun !

### 3 – Legal

This soundbank is provided « as is ». You can use it's patches (even in commercial productions), tweak the sounds, do whatever to them ! This bank is information, and informations wants to be free ! (so shall it remain, free to use for anyone !)

Don't use it at a too high volume, to preserve your hardware... and your hearing !

Anyway, I won't accept any liability in case of any known or yet unknown problem that might happen because of the use of this soundbank.

The archive was checked virus free but well, double check by yourself (even if I don't know how a Virus could use a synth1 bank to spread itself !)

The VST/VSTi technology is © Steinberg.

Synth1 & it's visual aspect is © Ichiro Toda. The screenshots included in this documentation fall into the fair use sections of the copyright laws.

#### 4 – More about the author

Don't worry, I won't ruin your day by telling you all the exciting events that took place in my glamorous popstar-like life ! ☺

However you might be interested in having an eye on...

...my soundcloud account. The place to which I upload my stuff... and also the place where there is that cool « dropbox » feature with which you can, for example, send me your tracks you did using patches from my Analog Dream soundbank ☺ (this would be greatly appreciated)

<http://soundcloud.com/tnkmusic68>

...my youtube channel. That's where I do exactly the same I do with my soundcloud account when it comes to videos. Well, I guess you all know what youtube is and what youtube channels are, so well, check mine out ! :

<http://www.youtube.com/tnkmusic68>

BTW, there is a video demo to this soundbank there :

<http://youtu.be/6Ojv6CfpQ3o>

...my facebook profile. This is my part of the worldwide effort to offer Mark Zuckerberg a decent living ☺ So if you LIKE my patches, why couldn't we become FRIENDS ? Sounds like a fine idea, doesn't it ?

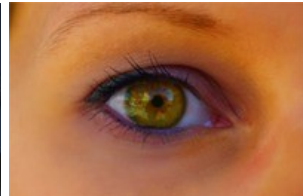

For friendship surf to...

<http://www.facebook.com/philippe.meisburger>

...my panoramio gallery. Because music's not my only passion, I also have a photo gallery where I upload (what I consider to be) my best shots and hey, people even seem to like them ! So don't hesitate to visit it and discover my visual universe !
