

Afro Plugin

Installation

PC / Windows

1. Use 7zip to unpack the downloaded files. This program is free and is available from here: <http://www.7-zip.org/download.html>
2. Extract/unzip all the files from the downloaded archive to your desktop or a location of your choice. Open the unzipped folder.
3. Select either the 32Bit or 64Bit folder.
4. You will see the AfroPlugin.instruments folder and AfroPlugin.dll file.
5. Move **both** the **(AfroPlugin.dll file and the AfroPlugin.instruments folder)** in to your audio plug-ins folder. This is usually located here: C:\Program Files\Vstplugins (select yes if asked for an administrator's permission)
6. When your DAW starts up, it will rescan your plug-ins folder and detect AfroPlugin. In some instances you may need to manually rescan your DAW's plug-in folder.
7. You will need 500MB of hard drive space to install AfroPlugin.

MAC / OSX VST Installation

1. Use UnRarX to unpack the downloaded files. This program is free and is available from here: <http://www.unrarx.com/>
2. You will see a file with a AfroPlugin.vst extension. This is the only file needed for AfroPlugin to run.
3. Move the AfroPlugin.vst file to the VST folder in your audio plug- ins folder (the default location is Macintosh HD/Library/Audio/Plug- Ins/VST).
4. When your DAW starts up, it will rescan your plug-ins folder and detect AfroPlugin.
5. You will need 500MB of hard drive space to install AfroPlugin.

MAC / OSX

Audio Units / AU Installation

1. Use UnRarX to unpack the downloaded files. This program is free and is available from here: <http://www.unrarx.com/>
2. You will see a file with a AfroPlugin.component extension. This is the only file needed for AfroPlugin to run.
3. Move the AfroPlugin.component file to the components folder in your audio plug-ins folder (the default location is Macintosh HD/Library/Audio/Plug-Ins/Components).
4. When your DAW starts up, it will rescan your plug-ins folder and detect AfroPlugin.
5. You will need 500MB of hard drive space to install AfroPlugin.

Troubleshooting

If you are having trouble with INSTALLING please read through the F.A.Q below or contact us:

IT DOESN'T SHOW UP IN MY DAW INSTRUMENT LIST:

The Plugin needs to be installed in your usual plug-ins folder such as **/program files/Vstplugins** for PC

MacintoshHD/Library/Audio/Plug-Ins/Components for MAC AU

MacintoshHD/Library/Audio/Plug-Ins/VST for MAC VST

SHALL I USE THE 32bit OR 64bit VERSION:

If you are using a 64bit DAW please use the 64bit version of the Plugin.

If you have a 64bit Operating system but are using a 32bit DAW please use the 32bit version, on PC's this will be **/program files (x86)/Vstplugins**
